

Alfred Letourneur towed this 22' model on his bicycle. Seven floor plans to choose from in this popular model.

# Airstream L

• The WORLD'S Lightest — Fastest — E

THE WORLD'S MOST TRAVELED TRAILER!

Scene at harbor in Vancouver, B.C., Canada, showing unloading of the now world famous Airstream Liner that Cornelius Vanderbilt, Jr. and Wally Byam used on their European tour. Since this photograph was taken, the Airstream Liner has toured Canada, the western United States and Mexico, and is now on display at McFaul Brothers in Glendale, California.

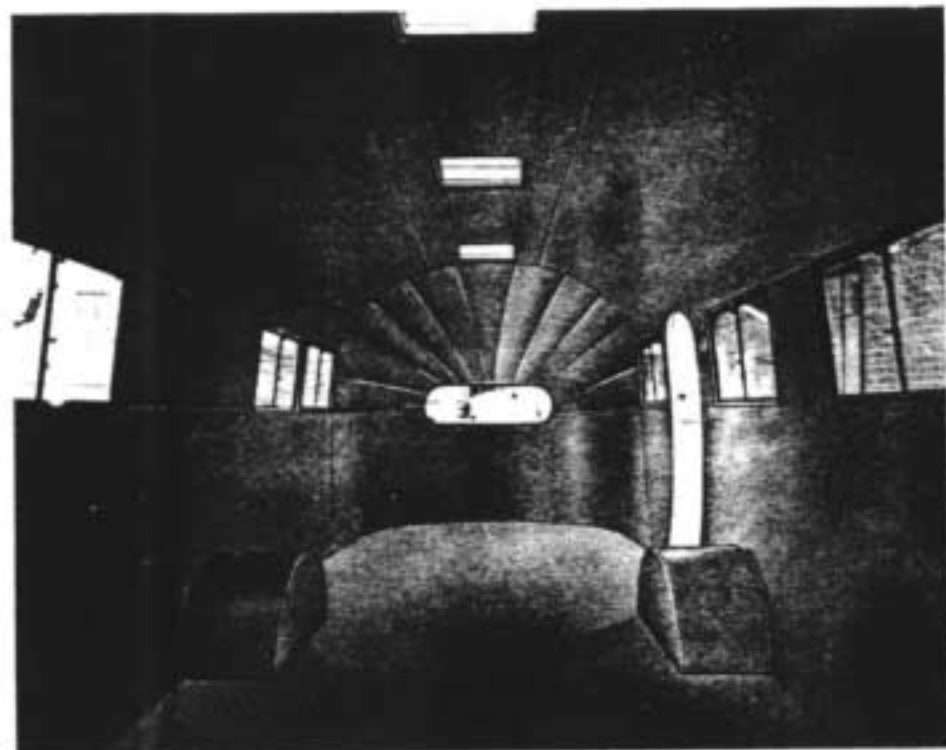

"THE TRAILWIND"

New size model, 16 ft. body, 18 ft. overall—the TRAILWIND—weight approximately 1600 lbs. Has brakes, full size double innerspring Hollywood bed, plus most of the same furnishings used in our larger models. Strictly deluxe throughout. Equipped to sleep four. Variable floor plans to suit your needs. *Truly a remarkable trailer!* Lists at \$1995.00\* f.o.b. Glendale, California.

(\* Prices and specifications subject to change without notice.)

The ever popular 20 foot body 22 foot overall Airstream Liner. We have many floor plans in this model, including the Globe Trotter with toilet and shower, the Trade Wind and the two new Southwind models—a. Walk around bed (Honeymoon Special); b. Twin beds (Second Honeymoon Special).

Remember—If you intend to tow a trailercoach — you can't beat an Airstream Liner.

IF YOU DON'T LIKE THE WAY WE FURNISH THE INTERIOR . . . DO IT YOURSELF!

Sure, we will sell you an Airstream Liner minus *all* the furnishings (see above photo). The "shell" comes with floor covering laid, electrical outlets and electric brakes. We have many customers who have bought Airstream Liners minus all or part of the furnishings and have furnished the interior themselves. They report, "Now we have exactly what we want and we enjoyed so much planning, figuring, putting gadgets here and there, that now it is part of us, and we really love it." So, if you don't like the way we furnish the Airstream Liner of your choice, you can furnish it to your own taste. And we'll be glad to help you plan your "dream trailer."

# Liner NEWS

EASIEST TOWING TRAILER COACHES •

## NEW FEATURES!

Shock absorbers (your car has four) hydraulic double action airplane type.

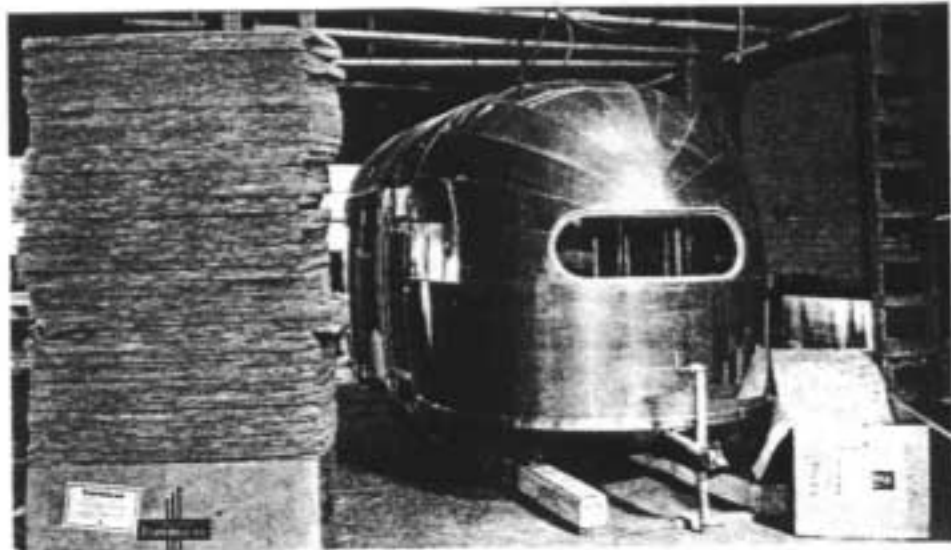

Best "tired" trailer on the market — six-ply heavy duty bus and truck on all models.

## COLD AND HEAT INSURANCE →

Photo shows a 16 ft. body Airstream Liner just before the insulation is installed. It takes the amount of spun glass stacked at left to completely blanket the interior of Airstream Liner. You will note the construction of the shells. The Airstream Liner has an inner and outer shell—both aluminum. Between these two shells go the sheets of 1 1/2" plasticized spun glass.

Make this comparison regarding all-metal construction . . . the modern electric refrigerator is all metal—inside and out . . . the modern cook stove is all metal—inside and out . . . the modern AIRSTREAM LINER is all metal—inside and out . . . AND all three use the same type of insulation.

Doesn't this go a long way to answer the question as to how well the Airstream Liner stands heat and cold? Further, by the use of all-metal, we gain these desirable features: 1. We save weight, gain strength. 2. Make the Airstream Liner the most fire-resistant trailercoach on the market. 3. It will never absorb odors, stay clean and fresh year after year.
