

# AIRSTREAM LINERS

"YES, HE DID"

## WHAT ABOUT PRICE?

One should not judge quality by size. Remember the old axiom, "Good things come in small packages." You do not judge a diamond by size, but by perfection and workmanship. A large imperfect diamond may sell for considerably less money than a small flawless diamond. . . . We think the Airstream Liner is a "perfect jewel."

WE ARE NOT trying to sell the Airstream Liner as a cheap trailer . . . but as the "Packard" and "Cadillac" in the travel trailercoach field.

### Let's Be Frank!

AIRSTREAM LINERS are DESIGNED TO TRAVEL . . . to go where and when you want . . . regardless of weather . . . take the hills in high . . . go any place an automobile can go . . . while still giving maximum livability with ALL the conveniences possible in a trailercoach.

The 1949 models have every so-called "bug" worked out of them. In fact, we honestly do not know of one single solitary detail we have overlooked in these new models to make them the best travel trailercoaches in the world!

### Light Weight Costs Money

Aeroplane type construction as used in the Airstream Liner is literally the monocoque principle requiring no internal supports—and is the strongest type of construction known today (it can be likened to the "Tube" under the Hudson) . . . costs more money to build . . . but in the long run is actually the most economical. Why? Simply because of its longer life . . . greater re-sale value . . . never needs paint . . . safety . . . AND THE TREMENDOUS SAVING IN TOWING COSTS.

The Airstream Liner is the safest trailercoach in the world for the highway . . . easier on your car . . . on your nerves . . . safer in traffic, mountains and "tight" places . . . safer when passing or being passed by buses or trucks as the Airstream Liner design keeps the vortex, or section of the wind, to an ABSOLUTE MINIMUM.

### You Be the Judge

Is not pride of ownership worth something? You are not buying just another trailer . . . you are buying the World's greatest travel trailercoach. Let us prove it!

DON'T BE FOOLED . . . Buy an Airstream Liner with confidence . . . be safe . . . and SAVE in the long run.

The AIRSTREAM LINER "Globe Trotter" model comes equipped with oil, gasoline, or butane cook stove, which, of course, is optional. This model was designed especially for those who are desirous of traveling and do not wish to stop at trailer parks.

### THERE IS NO SUBSTITUTE FOR LIGHT WEIGHT

Feminine apparel may be judged by the old or new look, but we can assure you the AIRSTREAM LINER is ALWAYS IN STYLE. Womenfolk tell us our charming model's attire has the old look—this photograph having been taken in August, 1947.

Elberta Healy, attractive young resident of Glendale, California, who was kind enough to give the above demonstration of how light the AIRSTREAM LINER really is, actually lifted up the front end of a 22 ft. model. There were absolutely no tricks of any kind used to get this photograph. We invite you to try it yourself!

In making the light "tongue" possible we want to assure you the wheels are placed in the right position for proper towing, being well set back of dead center. LIGHT WEIGHT ALONE makes it possible for a woman to lift the front end.

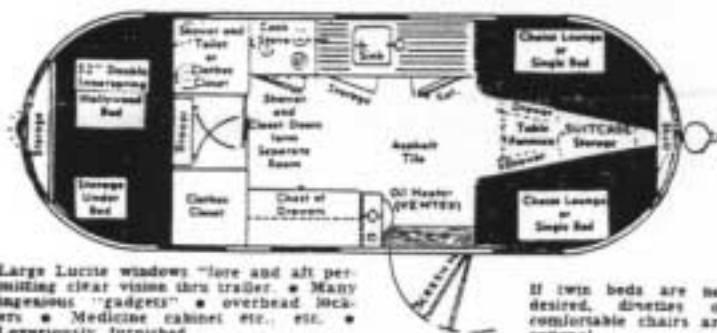

### AIRSTREAM'S GREATEST INTERIOR DESIGN

#### The New 1949

## GLOBE TROTTER MODEL

22' overall

New Models Show Many Improvements and Innovations

Large Lucite windows "love and aft" permitting clear vision thru trailer. • Many ingenious "gadgets" • overhead lockers • Medicine cabinet etc., etc. • Luxuriously furnished

If twin beds are not desired, divettes or comfortable chairs are optional.

**DO YOU KNOW?** The 1949 AIRSTREAM LINERS represent over 22 years' experience and know how in building all-metal trailercoaches? Innovation is the same as most of the leading refrigerator manufacturers see . . . SPUN GLASS . . . PLASTICIZED . . . "Al" metal makes the AIRSTREAM LINER the most fire resistant trailer in the world? Every thought in the building, designing and marketing of the AIRSTREAM LINER is to keep weight to the absolute minimum . . . ? If light weight, easy towing, quality, long life, good anything to you — you just can't beat the AIRSTREAM LINER? Don't be fooled . . . Buy an AIRSTREAM LINER with confidence . . . SAVE in the long run . . . If you intend to travel with a trailercoach — you just can't beat the AIRSTREAM LINER!
